

Employment Opportunities

Niowave is seeking qualified personnel for permanent staff and postdoctoral positions. We are the only company worldwide capable of building and testing a superconducting linear accelerator in our own facility, as well as delivering and commissioning complete accelerator systems for our customers. We are developing electron, proton and heavy ion accelerator systems for DOE, DOD, universities and international labs. We are also developing turn-key high average power electron guns and linacs for a broad range of applications.

Now Hiring:

- Accelerator Physicists
- Engineers (Chemical, Electrical, Mechanical, Nuclear, and other related disciplines)
- CAD Designers
- Machinists (CNC & Manual) and Welders
- Technicians (Electrical & Mechanical)
