US Particle Accelerator School Financial Aid Request Disclosure Form

To be filled out by applicant's advisor/supervisor.

This form must be submitted on a yearly basis or when applicant support status changes.

A letter of recommendation is also required.

Need-based USPAS financial aid is granted on an available-funding basis to qualified individuals who are actively enrolled as a student or in early career status (within 5 years of last degree) at the time of their application. Individuals associated with or supported by institutions that are part of the USPAS collaboration (see membership list here) are generally not eligible because of an agreement by collaboration member institutions to support their students and employees to attend the USPAS. If project or grant funding is available to support an applicant, that funding should be applied in preference to requesting the USPAS financial aid. This allows for limited USPAS finances to be applied to maximize session enrollment for the benefit of the Accelerator Science and Technology community.
