

## Joint US-CERN-JAPAN-RUSSIA Accelerator School

### *Frontiers of Accelerator Technology: High Quality Beams*

July 1-14, 2000

Held aboard a riverboat on the Volga River, between St. Petersburg and Moscow

This international program provides an excellent educational opportunity for graduate students, postdocs, research scientists and engineers in university departments, which use particle accelerators, and in manufacturing companies, which specialize in equipment for accelerators in this important and growing field. The School consists of approximately 9 working days of intensive lectures and mini-courses on the wide range of technologies that form the base of the beam/accelerator field. In particular the School will focus on the physics and technology of attaining high-quality particle and photon beams for scientific research and for industrial applications.

Please apply no later than April 15, 2000. The registration fee is \$1200.00 before May 1, 2000 and \$1400.00 after May 1. The registration fee includes room and full board.

For more information or to obtain an application, please visit the web site or contact:
